Jeti 3348 UV GALAXY RTR

Jeti 3348 Galaxy UV Roll to Roll

The Jeti 3348 UV Galaxy RTR utilizes 48 Spectra heads and environmentally friendly UV curable inks to produce the fastest output of any UV roll to roll grand-format printer on the market today. The UV lamps instantly dry the UV-curable Premium inks, these specially formulated inks yield a wider color gamut and exhibit excellent flexibility and superior adhesion on a variety of materials fabric, canvas, vinyl, plastic film, paper and polyester including 100% PE eco-friendly opening many new markets. The flexibility of printing in 6 color with True up to 600 dpi resolution gives the Jeti 3348 UV Galaxy the highest quality of any printer in its class achieving 80 sqm/hr (862 sqft/hr) in the production billboard mode. A take-up unit is built into the printer allowing the machine to be run by a single operator. Technological software enhancements can detect if any individual nozzle may be misfiring and be compensated by the surrounding nozzles. The software will automatically compensate the saturation, safe-guarding the image output. This safe-proof technology is the first of its kind in the grand-format arena. The Jeti 3348 UV Galaxy also includes an automatic head capping feature (auto caps in 15 minutes if machine sets) and automated air vacuum system that eliminates manual head wiping. This complete printing solution provides an economic advantage for our customers.

The Jeti 3348 UV Galaxy host a 3.3m (10'10") print area that allows operators to get the most from the new TRUE 600 dpi resolution, the highest quality on the market today.
