 Desktop Printing - Tile large jobs

DIRECT VINYL CUT FEATURES

- Fill Plot
- Automatic Registration Marks
- Interactive Cutter Control
- Auto-weld
- Auto-trap
- Poll Size
- Weedlines
- Cut by color
- Use independent driver options per color
- Color Nesting
- Manual Split Lines
- Overcut
- Repeat Job
- Optimize Cutting Distance
- Unidirectional Cutting
- Eliminate Line Segment Overlap
- All Cutter Drivers
- Archive job after sending

PRINTING FEATURES

General Printing Features

Receive Jobs from Local Computer

Receive Jobs from a network computer

Print from any Application

Printer Drivers

50 setups

Make Setup Active/Inactive

Move Job to Another Queue

Manual Job Sorting

Separate Hold / RIP and Output Queue

Job preview area

Print Wizard

Smart Hotfolders

Configurable hotfolder path

Presets - Save, Load, Import, Export Ink

Estimation

Edit With other applications

Break Apart multi-page jobs

Output size compensation

Supported File Formats

Vector formats AI, EPS, PDF

Bitmap formats PSD, TIF, JPG, PNG, BMP

AutoCAD 14 DWG/DXF

HPGL/2

DCS

Flexi (.FS), PhotoPRINT (.PD)

Job Control - Layout

Media size control

Poll size for supported devices

Borderless printing for supported devices

CONTOUR CUTTING FEATURES

- Industry-Leading Print & Cut Workflow
- 3rd Party RIP support for ContourCutting
- Multiple Contour Path support
- Nest contour cut jobs
- Contour Cutting on A Hybrid
- Contour Cutting on A Virtual Hybrid Printer / Cutter
- Registration Marks
- Print negative registration marks
- Set Registration mark options for supported devices
- Configure Default cutter
- Rotate cut job
- Configure Cutter Resolution
- Set amount of passes
- Advance after plot
- Send arc commands for supported devices
- Define knife offset
- Define packet size
- Eliminate line segment overlap
- Control curve quality
- Control cutter settings per contour path color
- Define Pressure and Speed
- Define acceleration on supported cutters
- Support for cutters with Barcode system
