

TrafficJet™

A complete, simple and clean solution to traffic sign fabrication

For 40 years, little has changed in the technology used to produce traffic control signs. **Until today.**

Finally - a solution to messy screen printing and labor-intensive cut & weed legend application. Digital printing - a new way to modernize and improve shop efficiency.

Be state-of-the art with Avery Dennison's TrafficJet Print System. It's the first system engineered to offer the simplicity of eco-solvent inkjet printing with the expected long-term durability and warranted sheeting performance.

TrafficJet 1638 System printer

TrafficJet™ Print System

TrafficJet – Simple, clean and cost-effective. With warranted durability. Avery Dennison’s TrafficJet print system offers incredible value, with an economical upfront and efficient running cost. TrafficJet spot colors are engineered to meet the color, retroreflectivity and durability requirements of the traffic industry’s rigid specifications. Signs produced using TrafficJet carry the same warranty as signs produced by screen printing and colored overlay films. Our exclusive position as the system supplier guarantees performance compatibility between printer, inks, reflective sheeting and protective overlay when needed.

ENGINEERED TO MEET YOUR SIGN FABRICATION NEEDS

- > Easy, efficient sign fabrication
- > Improved labor and material efficiency - no cutting, premasking or weeding
- > Quick order turnaround - direct to print from design
- > Lower operating costs - produce “just-in-time” instead of “just-in-case”
- > Print unattended, with a single operator managing multiple printers
- > Print signs in any orientation on our omni-directional sheeting, maximizing space while optimizing retroreflectivity

- > Only system engineered and supported by an industry-leading sheeting manufacturer - complete ten and twelve year durability warranty
- > TrafficJet ships complete with design and RIP software. It includes professional installation and operator training for support every step of the way
- > Fully compatible with Avery Dennison ReadyPro Signmaking System, which includes SignCAD® state-of-the art design software featuring pre-designed MUTCD and multiple state DOT sign library files, and Graphtec’s FC-8000 series cutter plotters for quick and efficient cutting of prismatic sheetings
- > Ideal for multi-color signs and complex street name signs with variable information

From design to print

Capacity	8-Color
Ink	TrafficJet Eco-Solvent
Format	Roll-fed
